SUMMARY

Computer Science student at Bartın University focused on UI/UX and mobile product design. Two-time design competition winner (Teknofest, PPI Dunia) with hands-on experience in user research, Figma prototyping and Flutter development, and a track record of leading teams of up to 78 people. Seeking a UI/UX or product design internship (remote or in Türkiye).

EDUCATION

Bartın University — Bartın, Türkiye
B.Sc. in Computer Technology and Information Systems — Expected July 2027
Relevant coursework: UI/UX Design, Human–Computer Interaction, Visual Programming, Software Engineering

PROJECTS & COMPETITIONS

N'Sosyal Super App — *3rd Place, Creathon* — Teknofest

- Designed a super-app concept combining social media, instant messaging, digital payments, transportation and food ordering during a 36-hour team creathon.
- Mapped user flows, built wireframes and high-fidelity Figma prototypes, applying user-centered design principles to simplify navigation across features.

Greenest — Sustainable Living Platform — *2nd Place, UI/UX Design Competition* — PPI Dunia

- Conducted problem analysis and created user personas, user journeys and user flows in a team of 4 to ground the product in real user needs.
- Designed the end-to-end UI and presented the solution to a national-level panel of judges.

PPI Bartın Official Website — *UI/UX Designer* — PPI Bartın

- Designed the UX/UI and information architecture of the official website to make organization information easier to find and navigate.
- Iterated on designs through design reviews and feedback from the development team and users.

Ollama Vision — Offline AI Personal Assistant — *Python, PyQt, Ollama* — Bartın University

- Built a desktop application with Python and PyQt that runs a private, offline AI chatbot through Ollama, with no cloud dependency.
- Developed task-management features for creating, organizing and tracking daily activities.
- Coordinated project planning, feature prioritization and task distribution across the team.

Mega Shop — Social Commerce Mobile App — *Flutter* — Bartın University

- Designed and developed the Flutter front end of a mobile app combining social networking and e-commerce, with a consistent, responsive experience across devices.
- Defined product requirements, user journeys and app architecture with the team, and created user flows and wireframes.

LEADERSHIP EXPERIENCE

Chief Executive — Digination Festival 2026, PPI Dunia — Remote | Mar 2026 – Jun 2026

- Led a 78-member committee and 6 division heads to deliver one of PPI Dunia's largest student-led technology events.
- Organized a national IoT Innovation Competition with 21 teams from various institutions, plus technology webinars attended by 300+ participants.
- Managed end-to-end event planning, stakeholder relations, team coordination and operations.

Head of Digital Innovation Subdivision — Dirkominfo, PPI Dunia — Remote | Nov 2025 – Jul 2026

- Planned innovation programs and designed competition and webinar concepts on emerging technologies and digital transformation.
- Prepared competition frameworks, judging criteria and technical guidelines, and built connections with practitioners, mentors and speakers.

Head of Creative Media — PPI Bartın — Bartın, Türkiye | Apr 2024 – Mar 2025

- Led the content, design and social media teams, growing Instagram and TikTok reach through data-driven content strategy and consistent production.
- Launched PPI Bartın's first official LinkedIn page and kept branding consistent across all digital channels.
